SUMMARY

Computer Science undergraduate with experience building full-stack AI systems, real-time backend services, and machine learning applications using FastAPI, React, Python, and PyTorch. Skilled in REST APIs, WebSockets, scalable system design, and cloud-ready software development, with hands-on experience in Dockerized deployments and ML-based applications.

EDUCATION

Acharya Institute of Technology Expected 2028
Bachelor of Engineering in Computer Science **GPA: 8.08/10.0**

EXPERIENCE

Technical Interviewer Intern 12/2025 – Present
Newton School of Technology *Bangalore, India*

- Conducted 150+ technical interviews including DSA rounds, evaluating programming aptitude, problem-solving skills, and algorithmic thinking across multiple domains
- Collaborating with academic team to refine assessment criteria and maintain consistent evaluation standards
- Providing detailed feedback to candidates and maintaining comprehensive evaluation documentation

Academic Interviewer Intern 07/2025 – 08/2025
Incanus Technologies Private Limited (Newton School) *Bangalore, India*

- Conducted 80+ technical and academic interviews during a concentrated two-month internship, ensuring high-quality candidate selection for academic programs
- Successfully completed intensive orientation and training program to develop skills in core assessment concepts
- Demonstrated high professionalism while adhering strictly to intellectual property and confidentiality agreements

PROJECTS

Precursa: AI-Driven Maritime Logistics Monitoring & Disruption Risk Platform

- Built real-time maritime logistics platform tracking live vessel movement and weather signals to generate a dynamic Disruption Risk Index (DRI)
- Designed multi-factor risk engine and integrated Gemini-powered AI copilot for automated disruption analysis and delay prediction
- Developed secure full-stack deployment with live map visualization, authenticated APIs, and rate-limited write pipelines
- **Technologies:** Python, FastAPI, React (Vite), Express, Gemini API, Leaflet, Clerk, Docker, Pytest
- **GitHub:** github.com/HARDIKSINGH150206/PRECURSA

KAVACH: Dual-Vector AI Fraud Shield & Threat Fusion Dashboard

- Engineered real-time fraud detection platform analyzing live audio streams for deepfakes and SMS messages for phishing attacks
- Built asynchronous FastAPI backend with binary WebSocket streaming and ML-based voice/text threat classification pipelines
- Developed React dashboard with live spectrogram visualization; validated reliability through 69 automated tests
- **Technologies:** Python, FastAPI, WebSocket, PyTorch, scikit-learn, React, Vite, Docker, librosa
- **GitHub:** github.com/HARDIKSINGH150206/KAVACH

EduPlan: ERP Attendance Analytics & Absence Optimization Engine

- Developed attendance analytics platform automating ERP scraping and predicting safe-to-skip classes while preserving eligibility
- Implemented Selenium-based sync engine and attendance optimization logic with built-in academic safety thresholds
- Built responsive scheduling dashboard with encrypted hybrid cloud/local storage for secure academic planning
- **Technologies:** Python, Selenium, MongoDB, React, Node.js, Cryptography, HTML5, CSS3
- **GitHub:** github.com/HARDIKSINGH150206/HELP-me-BUNK

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, HTML5, CSS3, SQL

Frameworks/Libraries: FastAPI, React, Node.js, Express, PyTorch, scikit-learn, Selenium

Developer Tools: Git, GitHub, Docker, Linux, Postman, Pytest, CI/CD

Cloud: AWS (Basics), Firebase, Docker Compose

Databases/Storage: MongoDB, JSON

Core Areas: Machine Learning, REST APIs, WebSockets, System Design, Data Structures & Algorithms

AWARDS & RECOGNITION

62nd Position, NEC25 (IIT Bombay) – Secured top 1.4% rank among 4500+ teams nationwide

2nd Place, Eureka! (E-Cell IIT Bombay) – Recognized for business model and financial planning for HELIOSkin

3rd Place, Surjana Ideathon (Chanakya University) – Developed Media Forensics concept to combat misinformation

5th Place, Surjana Hackathon (Chanakya University) – Top-five placement in Agentic AI in Healthcare
